INTRODUCING THE *NEW*

LAUNCH BATTERY SOH TESTING

EV battery health is becoming too important to leave to guesswork. As the number of electric vehicles on UK roads continues to grow, knowing the condition of the high-voltage battery is becoming an increasingly important part of professional vehicle assessment.

Designed for the electric vehicle aftermarket, the **LAUNCH BATTERY SOH TESTING** software gives automotive professionals a faster and clearer way to understand the condition of an electric vehicle's high-voltage battery.

By transforming complex diagnostic data into usable insights, technicians can quickly assess battery condition, explain the results and make better-informed decisions around battery health.

Battery Health Check
CARA Approved

Detailed battery report
- State Of Health (SOH)
- State Of Charge (SOC)
- Voltage
- Current
- Temperature
- BMS information
- Individual cell voltage & temperature data

FAST
Useful battery health assessment without lengthy procedures.

CLEAR
Complex diagnostic data made easier to understand and explain.

ACCURATE
Reliable results with ±1.0% deviation compared to OEM diagnostic results.

The **LAUNCH BATTERY SOH TESTING** helps create value across a range of applications – from independent workshops and fleet operators to leasing businesses and used EV sales. - And with **CARA-certified** battery assessment, it adds further credibility, transparency and standardisation to EV battery condition evaluation.

CARA
Approved Battery Health Check

Know the battery.
Explain the battery.
Make better-informed decisions.
