DM4.0PRO 400V

4000 KG

ELEVADOR TIJERA
ELECTROHIDRÁULICO

- Elevador de tijera de empotrar
- Compatible para instalación en superficie
- Perfil bajo
- Plataformas extensibles. Doble extensión
- Micro interruptor final de carrera
- Mecanismo de arranque para levantar mayor carga desde la posición más baja
- Calzos para distintos tipos de vehículos
- Seguridad mediante doble circuito hidráulico independiente

SCISSOR LIFT
ELECTRO-HYDRAULIC

- Inground installation
- Also compatible for surface installation
- Low profile
- Movable kit devices
- Extensible platforms. Double extension
- Top limit switch maximum height
- Boot system to lift heavier weights from the lowest position
- Extension pads for different types of vehicles
- Safety system by double independent hydraulic circuit

PONT ÉLÉVATEUR À CISEAUX
ÉLECTROHYDRAULIQUE

- Pont à ciseaux pour installation encastrée
- Compatible pour installation en surface
- Profil bas
- Plate-formes extensibles. Double extension
- Interrupteur fin de course
- Système de démarrage pour lever une charge importante depuis la position la plus basse
- Cales pour différents types de véhicule
- Sécurité double circuit hydraulique indépendante
